STEERING COMMITTEE

September 30, 2026

We are looking for 8 – 10 volunteers to form a Steering Committee to establish a community association at the University District in Calgary.

This is the process over the next year:

- The first step is identifying a core group of interested residents who are willing to help move the initiative forward.
- To establish a Community Association, we typically look for at least 8 - 10 committed volunteers who are interested in serving in leadership or board roles.
- After a core group of interested residents has been identified, we will meet with the City of Calgary for a detailed overview of the process, requirements, supports available, and next steps.
- Incorporating as a society is a required step in forming a Community Association and generally requires a minimum of 5 founding members.
- The process of forming a Community Association often takes 3 – 12 months from initial discussions to an inaugural AGM, depending on volunteer capacity and community interest.
